

[Lab] Hidden Markov Model (HMM)

Jae Yun JUN KIM*

August 20, 2019

Due: Before the next lab session.

Evaluation: Interrogation during the next lab session about:

- code (in group of up to 3 people)
- (theoretical, practical) questions (individual)

Remark:

- Only groups of one/two/three people accepted. Forbidden groups of larger number of people.
 - No late homework will be accepted.
 - No plagiarism. If plagiarism happens, both the “lender” and the “borrower” will have a zero.
 - Code yourself from scratch. No homework will be considered if you solve the problem using any ML library.
 - Do thoroughly all the demanded tasks.
 - Study the theory for the interrogation.
-

1 Tasks

1. Implement yourself the HMM algorithm to solve the evaluation and decoding problems for the **Example** given in class.
2. Compare your results to those that were given in this example.
